# Final Exam for: IS-700.a: National Incident Management System (NIMS) An Introduction

Each time that this test is taken online, questions and answers are scrambled to protect the integrity of the exam

# Completion of this examination is an individual effort

- Who is the individual responsible for all incident activities, including the development of strategies and tactics and the ordering and release of resources?
  - o Incident Commander
  - o Emergency Operations Center Manager
  - o Agency Executive or Senior Official
  - o Operations Section Chief
- The credentialing process involves an objective evaluation and documentation of an individual's: Current certification, license, or degree. Training and experience, and \_\_\_\_\_\_.
  - Security clearance level.
  - o Competence or proficiency.
  - o Compensation amount.
  - Supervisory expertise.
- Mutual aid agreements and assistance agreements provide:
  - Strategies for restoring critical infrastructure that affects multiple sectors and jurisdictions across specified geographical areas.
  - Steps for ensuring the continuity of government at the local, tribal, and State levels following a catastrophic incident.
  - Lists of specialized codes for facilitating communication among responders representing different departments, agencies, and jurisdictions.
  - Mechanisms to quickly obtain emergency assistance in the form of personnel, equipment, materials, and other associated services.
- Which organization has line authority to oversee the management of multiple incidents being handled by separate Incident Command organizations?
  - o Multiagency Command
  - o Area Command
  - o Joint Command
  - o United Command

- In an Incident Command System organization, the term 'General Staff' refers to:
  - Generalists who are assigned to support Section Chiefs with functions such as administrative matters and documentation of incident events.
  - Any combination of personnel resources assembled to support a specific mission or operational need with common communications and a designated leader.
  - Incident management personnel organized according to function (i.e., Operations Section Chief, Planning Section Chief, Logistics Section Chief, and Finance/Administration Section Chief) and who report directly to the Incident Commander.
  - A person assigned by a cooperating agency or nongovernmental/private organization who has been delegated authority to make decisions affecting that agency's or organization's participation in incident management activities.
- The Joint Information System is:
  - The framework for organizing, integrating, and coordinating the delivery of public information.
  - The automated system used by the Situation Unit within the Planning Section to synthesize information and produce reports.
  - A set of guidelines and protocols for sharing sensitive and classified information during an incident response.
  - A 24/7 multiagency watch center that provides Federal prevention, protection, and preparedness coordination.

### • Unified Command:

- Assigns a single Incident Commander to assume unity of command and make decisions for all jurisdictions.
- Requires that employees report to several different Incident Commanders, each representing each jurisdiction.
- Obligates all responsible agencies to pool their resources without consideration to the terms of mutual aid and assistance agreements.
- Enables all agencies with responsibility to manage an incident together by establishing a common set of incident objectives and strategies.
- The act of directing, ordering, or controlling by virtue of explicit statutory, regulatory, or delegated authority at the field level is referred to as:
  - o Coordination
  - o Direction
  - Leadership
  - Command
- This structure is the physical location at which the coordination of information and resources to support incident management (on-scene operations) activities normally takes place.
  - o Incident Command Post
  - Joint Command Post
  - Strategic Operations Center
  - o Emergency Operations Center

#### Exercises should:

Include multidisciplinary, multijurisdictional incidents. Include participation of private-sector and nongovernmental organizations. Cover aspects of preparedness plans, including activating mutual aid and assistance agreements and

- o Contain a mechanism for incorporating corrective actions.
- o Be repeated until performance is at an acceptable level.
- o Be based on the most catastrophic scenario that could affect the community.
- Have consequences for inadequate performance.

#### • The Public Information Officer:

- o Directs the Joint Information Center operation with the Emergency Operations Center.
- Serves as a press secretary for the Agency Executive or Senior Official during the incident.
- Controls messaging and limits the independence of other organizations participating in the incident.
- o Interfaces with the public and media and/or with other agencies regarding incident-related information requirements.
- Homeland Security Presidential Directive 5 (HSPD-5) requires all Federal departments and agencies to:
  - Establish a panel that will evaluate activities at the State, tribal, and local levels to ensure compliance with NIMS.
  - Create NIMS strike teams that can manage incident operations if a local government fails to comply with NIMS.
  - Implement NIMS as the doctrine for how best to organize and manage all routine, dayto-day department/agency operations.
  - o Make adoption of NIMS by State, tribal, and local organizations a condition for Federal preparedness assistance (through grants, contracts, and other activities).
- Select the statement below that best describes one benefit of NIMS.
  - Establishment of standardized organizational structures that improve integration among jurisdictions and disciplines.
  - Creation of a comprehensive tactical plan for operational incident management that can be used for every incident.
  - Development of comprehensive strategies for addressing the management of international events.
  - Funding for additional staff and other resources to address operations that are not NIMS compliant.
- A basic premise of the NIMS and National Response Framework (NRF) is that:
  - o Incidents should be managed at the lowest jurisdictional level possible.
  - Effective response relies on the readiness of response partners to self-dispatch to an incident scene.
  - Preparedness is inherently a government responsibility and does not require participation from nongovernmental organizations.
  - Unity of effort and command results when responding jurisdictions and agencies are willing to relinquish their authorities.

- The National Response Framework (NRF) presents the guiding principles that:
  - Are singly focused on improving Federal homeland security agencies' response to catastrophic natural hazards and terrorist-related incidents.
  - Provide the structure and mechanisms to ensure effective Federal support of State, tribal, and local related activities.
  - Mandate specific operational plans for local responders to use when managing a wide range of incidents.
  - Supersede the National Incident Management System's framework when Federal agency and departments are assisting in a response.
- HSPD-5 required the Secretary of Homeland Security to establish a mechanism for ensuring the ongoing management and maintenance of NIMS. The Secretary established the National Integration Center (NIC) to perform all of the following functions EXCEPT:
  - o Inventorying and tracking all national resources and assets available for deployment in incidents managed using NIMS.
  - Facilitating the establishment and maintenance of a documentation and database system related to qualification, certification, and credentialing of emergency management/response personnel and organizations.
  - Developing assessment criteria for the various components of NIMS, as well as compliance requirements and timelines.
  - Promoting compatibility between national-level standards for NIMS and those developed by other public, private, and professional groups.

## • Interoperability:

- Primarily involves creating automated systems that allow for the sharing of sensitive incident information.
- Requires nongovernmental and private-sector organizations to purchase standardized communication equipment.
- Involves oversight by the Federal Communications Commission for assigning emergency frequencies.
- Is the ability of emergency management/response personnel to interact and work well together.
- To better serve their constituents, elected and appointed officials should do the following, EXCEPT FOR:
  - Help to establish relationships (including mutual aid agreements and assistance agreements) with other jurisdictions and, as appropriate, with nongovernmental organizations and the private sector.
  - Understand laws and regulations in their jurisdictions that pertain to emergency management and incident response.
  - Assume the role of incident commander for all incidents and direct the on-scene technical operations from the Emergency Operations Center.
  - o Provide guidance to their jurisdictions, departments, and/or agencies, with clearly stated policies for NIMS implementation.

- Select the TRUE statement:
  - Frequently jurisdictions and agencies self-dispatch resources in anticipation of a need at the incident scene.
  - o In a complex incident within a State, an Area Commander would request resources directly from DHS and FEMA.
  - Typically requests for resources flow from the on-scene incident command through the local and State Emergency Operations Centers to the Federal Government.
  - o Prior to requesting assistance through intrastate mutual aid, a State must first ask the Federal Government for resources.
- Which of the following statements is FALSE?
  - o NIMS is based on best practices collected from all levels of responders.
  - NIMS is applicable across the full spectrum of potential incidents, regardless of cause, size, location, or complexity.
  - o NIMS specifies how resources will be allocated among jurisdictions.
  - o NIMS integrates best practices into a comprehensive, standardized framework.
- Select the TRUE statement about the Incident Action Plan.
  - Covers the entire incident from start to finish.
  - o Establishes the overall incident objectives, strategies, and tactics.
  - o Presents detailed cost accounting for all incident resources.
  - o Must be a written document that is distributed to all responders.
- Which position is responsible for the direct management of all incident-related tactical activities?
  - Finance/Administration Section Chief
  - Operations Section Chief
  - o Planning Section Chief
  - o Logistics Section Chief
- ICS encourages jurisdictions to use common terminology. Common terminology:
  - o Is unique terminology that responders use when managing incidents.
  - o Applies exclusively to the naming of facilities used by the Command Staff.
  - Uses plain English to allow personnel from different agencies to work together.
  - o Encourages the use of radio codes to communicate efficiently at incident site.
- Select the NIMS term that is defined as 'the architecture to support coordination for incident prioritization, critical resource allocation, communications systems integration, and information coordination.'
  - Multiagency Coordination System
  - Command and Control Center
  - o Incident Operations Network
  - o Incident Management Team

- Which entity provides a structure for developing and delivering incident-related coordinated messages by developing, recommending, and executing public information plans and strategies?
  - o Joint Information Base
  - o Joint Information Operation
  - o Joint Information Center
  - o Joint Information System
- Incident managers begin planning for the demobilization process:
  - When incident activities shift from response to recovery.
  - o As soon as possible to facilitate accountability of the resources.
  - o After being requested by the Emergency Operations Center.
  - o Right before the first resources are ready to be released.
